SUMMARY

I am a young software engineer seeking a full-time position or internship. First time I have encountered programming was at work. It was writing primitive systems and backtests in CQG (our technical analysis software). I liked it so much that I have decided to fully dedicate myself to the new passion.

I went to the bootcamp Coders Lab in order to maximize effectiveness of learning. It was extensive, 360 hour course covering Python, Flask, Django and basics of JavaScript&JQuery. I'm currently learning XML and C++ at University. In my free time I do courses on Udemy and write my own projects. I've also learned basics of Java on my own so it's no stranger to me. My primary interests in IT are data science, machine learning, quantitative finance and web development.

LANGUAGES

ENGLISH C1	<div><div></div></div>
NORWEGIAN B2	<div><div></div></div>
RUSSIAN A2	<div><div></div></div>

EDUCATION

CODERSLAB, PROGRAMMING SCHOOL
Python specialisation
2017

CRACOW UNIVERSITY OF ECONOMICS
Applied Computer Science
2017-2020

CRACOW UNIVERSITY OF ECONOMICS
Finance and International Investments
(Interrupted due to starting a new job)
2015-2016

TECHNOLOGIES

- Python
- Django
- Flask
- JS
- JQuery
- Scrapy
- Pandas
- Matplotlib
- Linux
- GIT
- Java
- MySQL
- JQuery
- R
- C++
- XML

EXPERIENCE

FUTURES TRADER

OSTC 2016 - 2017

- Operate various software applications and apply knowledge of stock market in order to successfully trade futures throughout each session.
- Manage risks associated with future properties and communicate with the rest of the team throughout sessions.
- Apply innovative strategies to garner highest returns and minimize the risks inherent in trading futures.
- Order execution.

OWN CONSTRUCTION COMPANY

2014 - 2015

- Active acquisition of new contracts.
- Efficiently completed all contracted work.

COURSES

- Udemy: Hands-On Python & R In Data Science
- Udemy: Statistics for Data Analysis Using R
- Udemy: The Complete Javascript Course

INTERESTS
